A;Gene: SGD:SNF1; MIPS:YDR477w
A;Cross-references: SGD:S0002885; MIPS:YDR477w
A;Map position: 4R
C;Function:
A;Nescription: catalyzes the formation of peptidyl-serine-phosphate or peptidyl-threonin
A;Note: required for expression of jlucose repressed genes in response to glucose depriv
C;Superfamily: AMP-activated protein kinase; protein kinase homology
C;Keywords: ATP; autophosphorylation; magnesium; nucleus; phosphoprotein; phosphotransfe
F;53-306/Domain: protein kinase homology <KINs
F;61-69/Region: protein kinase ATP-binding motif
F;84,103,177,179/Active site: Lys, Glu, Asp, Lys #status predicted
F;84,103,177,179/Active site: magnesium (Asn, Asp) #status predicted
F;820/Binding site: mbosphate (Thr) (covalent) (by unidentified kinase) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  A;Cross-references:

Does not appear to function in the programmed death of non-neuronal cells. May serve as an endogenous antagonist competing for substrate with functional kinases that act to promote neuronal cell survival.

TISSUE SPECIFICITY: Detected only in the lung. Not detected in the heart, brain, spleen, liver, skeletal muscle, kidney and testis.

INDUCTION: Expression induced during programmed cell death evoked in neuronal cells by NGF-depletion.

SIMILARITY: Contains 1 protein kinase domain.

"Generic evaluation of the function of SNF1 in Candida tropicalis.";
Submitted (MAR-1999) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Essential for release from glucose repression. It
interacts and has functional relationship to the regulatory
protein SNF4. Could phosphorylates CAT8 (By similarity).
-!- SUBCELLULAR LOCATION: Associated with the nuclear membrane (By
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         15-JUL-1999
